

Please mark your calendar and plan to attend the annual picnic and short meeting on July 25th, 11 am. Flyer is included in this newsletter. This is a REAL meeting and picnic. Bring your Basset Hounds and let Carol know what side dish you are bringing. Timberline will provide brats and hamburgers.

Our 3 day all breed obedience/rally trials took place the end of May – a new experience for all of us. It was a lot of work but exhibitors were pleased and the club got a lot of positive feedback with encouragement to make it an annual event. The profit was not great mostly due to low rally entries but we learned a lot and came away with ideas to improve if we hold the event again. Obedience entries were high. Congratulations to the High in Trial from Cheyenne, WY from Utility B both Friday and Saturday with near perfect performances.

‘The deadline is approaching for sending in the form with a photo and information on any new titles your Basset earned the past 2 years, in order to get an award plaque at the specialty in September. Plaques will be mailed to those who cannot attend. A copy of the form can be found at https://www.basset-tbhc.org/tbhc_documents.html under TBHC documents. The form will also be attached to the July picnic/meeting notice email. Mishka and Malina are working on this project with help from Marilee, so please don't delay. We'd like to get the scrapbooks updated and have enough time to get the plaques ready.. Thank you.

Sharing Health Information from Breeder Rudy Smits, The Netherlands

LAFORA DISEASE in basset hounds: no panic but openness always important! Recently I found out that our Elvis (Electrifying Elvis v. Grunsven) produced offspring abroad affected by Lafora disease, a metabolic (brain) disease that can give 'tics' around 5 years of age and later even epilepsy. I never saw a case myself and never heard that we bred one ourselves. But a daughter of our Model and granddaughter of Elvis bred abroad seems to be a 'double carrier': affected although no health problems at this moment. So this means our Model is a carrier also. Elvis is dead for years but still important to know. Model is still 'alive and kicking'. He won't be taken out of breeding but can only be used on bitches that are proven to be free of Lafora. It can be tested at Laboklin. Watch out that the 'basset hound mutation' is tested if you let your dog get tested. Knowing of at least 3 carriers of Lafora now it seems wider spread than we would think. All 3 are not closely related!
